Subject: 42 NAUTICA PONT=ON REPLACEMENT UPDATE

=div dir="ltr">

Hi Anna,

=p class="MsoNormal">I just wanted so thank you for stopping in today and y=ur always welcome to stop by and check on progress of the project.

It w=s clear to me there was some miscommunication go on for awhile and I am hap=y we were able to clear things up which would allow us to do business easie= going forward.

<= class="MsoNormal">LLC has always been a very good customer and I would l=ve to keep it that way.

</=:p>

I trust we are meeting the expectations on th= improvements of what Mr. Epstein requested for the boat.

As you know i= preparation for the new pontoons, we noticed there are some addition= fiberglass repairs needed before we glue on the pontoons . These mino= repairs were not in the original estimate.

We also noticed the cleats=for the decks and fair leads are missing the proper backing plates and the h=rardware should be replaced while we have the access to do so with the pontoo=s off. Please let me know how you would like me to proceed these extr= repairs.

There is also a hose sitting loose on the starboard mid ship side of the boat that has no function in the boat. We will eliminate as discussed.

It is also understood we are waiting for you to get back to us what the final plan for the removal steps for entering and exiting the boat.

We are still waiting on the final decision with the repower of the boat. I just confirmed with the sales manager. We do have the engines in stock but there is a fair amount of parts that would need to be special ordered to have available for the install. Can you please let me know how you would like us to proceed? I am trying my best to avoid any more delays with the completions of this project.

If you have any questions don't hesitate to ask as I look forward to hearing back from you. Have a great day!!

Thanks,

Shannon Danet

Service Manager
