Jeffrey,  
I need to send our ELT from the Gulfteam out for service, the ELT sent a signal to the coast guard on our last trip, the ELT should be installed by Friday at the latest, keep me posted if there are any travel plans this week.  
is this OK?  
thank you,  
Larry

**S76C++**  
I have to change both our auto pilot control boxes. There is an Service Bulletin that effects 50 new C++ helicopters, ours is one of them. There are only three new control boxes currently available , I was able to be issued the two boxes I need to comply with this Service bulletin. They should arrive today via Fedex, I will install them later today and comply with a short flight test, if that is approved by you? I will take Darren with me on this flight.  
thank you,  
Larry
