No it will be a focal point in the kitchen and a major detail when looking up from the pool or from the water. It should be in keeping with the existing vocabulary . I'm not sure divided arch two large windows with s molding detail? I'm open to ideas

Will do. Has the window been designed yet? If not, any direction? Size? Type?

Warwick

Jeffrey is concerned about the elevation for the kitchen. when you show the window give him a couple of alternatives that reflect the architecture of the main house, one should incorporate a arch, maybe divided glass.
call me to discuss. Lets try to show the window on the next generation due out Tue. or Wed.
