call me after 3... the guard house should not be on axis it is not pretty enough, and especially you would get off the boat and look at a door. what you see trees plants etc we should discuss, the guard house should be quiet in the landscape , not a feature

Jeffrey:

This attached master plan sketch illustrates how the Hammam will sit on the site. We created large grass lawn terraces in an attempt to create order and geometry. The entire ridge top on this end of the island becomes the environment for the Hammam. Note that the earthwork mounds are very architectural in their shape near the Hammam but become more natural toward the French Cap Lookout.

I also have shown a revised 2nd beach guest house & tennis court.

Let me know what you think.
