4 potential investors into my healthcare data business will go with me to China Oct 19.

During this trip I will visit my friends/contacts at the major government run or linked institutions. They have huge capital available, and are allowed since Aug 09 to deploy it international in strategic assets but lack the skill, knowledge, concept.

You mentioned Apollo as your client etc. I want us to get chinese capital and manage it or work with it. What chinese need is a brand name with a track record for political protection (jpm, apollo, or show that financial trust is big and safe etc).

If you thinks its interesting I need your ideas, what you suggest?
Can we discuss this so I can prepare the chinese side before I go?
