dont' confuse lack of spin trap knoweldge with science,, it is mere engineering. its the theory of why so many free radicals. their various roles, a necessary but troublesome component. ITs the theory that is fun, are the radicals physical , or eletrical hooks , are they merely to catch , like fish, help combine like legos. , better question what to the COST of FREE radicals. sounds like a daily news headline

How are you?

Today Boris and I had a 4 hour meeting with bill tossing around ideas. It was fun but not nearly as fun as the old days when you used to know your science.

Ha ha.

Thought of you because I was trying to explain spin traps and the difference between fructose and glucose and it was a challenge.

Miss those days!!!
