hasan ,re landscape-- this is a total waste of time-- I'm done// there is no new idea. the drawings simply reiterate what is already there, with the addition of calling them terraces.. the plants are for later.. there is no information that is usefull whatsoever,, i have said that the views are NOT to be considered.. as they are always available as you drive or walk around the island. IT has been over a month and there is not one idea..

there is no sculpture or shape to the top of the hill,, there no sense of rythm place composton, I'm sorry.. I have more information on a local project that i am doing in 2 hrs, than i have receveid on this project in 7 weeks..

Dear Jeffrey,

On behalf of Hasan...

Attached you will find

-folder of 5 diagrams that pertain to strategies for the whole island.

-folder of 4 interior entry circulations options (see image for option 4)

We are currently working on entry approach and entry courtyard (which may be a homogenous relationship) see also attached two images of entry approach to the Alhambra.

Hasan can be reached at 9am tomorrow in his office.

Best,

Andrew
