Dear Jeffrey,

Hasan has asked me to send the following:

Attached you will find:

-A drafted version of a site plan focusing on entrance ("entrance landscape option")

-Building Plan

-Folder of jpegs:

Sketches:

1- Diagrammatic sketch of approach road- This sketch shows the possible new connection and circulation path from below the gym to the Hammam entry tower. Manipulations and patterning of the earth via contours and terraces as well as vegetation would follow.

(see drafted "entrance Landscape option" for more detail)

2-Diagrammatic sketch showing twisting of the tower- Concept being that all interior spaces follow strict geometry while spaces and pieces that break away from the building (starting with the tower) begin their own language and relationship that best benefits the landscape and site circulation.

Images:

1 and 2- Interior of pool area. We have begun modeling the interior spaces of the Hammam starting with the pool. These images are not to be taken literally and are only a starting point for details of patterns, plaster work etc -to be discussed. Columns from Cordoba are being used as a starting point for proportions of the space around the pool.

Hasan is available between 9am and 11am tomorrow.

Thank you,
Andrew
