Jeffrey please advise if you would like me to sea trial this boat if you are interested as a comparison to our Midnight?

Darren and Emad,

The boat Harris is presenting to JEE is a stripped boat with no options, I did not see mention of cutty cabin or open bow? Midnight has 2 hulls now, a 37 foot wide body and 39 foot narrow, I hope Harris explained this to JEE.

-There is a 2006 midnight for \$159,000.00 with triple verados installed, with nice equipment as comp..see web: <http://www.boattrader.com/listing/2006-Midnight-Express-center-console-94101219>

I would recommend this 2002 boat that Jeffrey located as a better value. I do not believe \$175K with our three Verado's installed is a good price for a plain boat. I do believe our Verado engines have a value of \$30,000 and could be sold very easily in Florida.

JEE located this fully equipped 2002 Midnight Express in West Palm Beach, cost to complete was \$489,000.00 with every large dollar option imaginable:

Asking \$239,000.00

-140 total hours on 2007 High performance Quad Mercury X/S 300 HP engines. (70mph)

-**Two 16,000 BTU air conditioners (one for cockpit) (one for cutty cabin).**

-**Generator to run a/c units.**

-Carbon Monoxide less air compressor accomindates four divers up to 100 feet of water.

-on board crane/hoist to lift personal water craft out of water

-included is a \$25,000 SeaBob, underwater personal water craft vehicle

-\$6,000 water making desalination system, 160 gallons per day.

-Auto Pilot coupled with Dual 16" GPS RayMarine moving map and plotter system, usually found on mega yachts.

-\$8,000 "**A.I.S. System**" (boat collision avoidance system). mandatory on 70 foot and larger yachts.

see attached web sight for photos:
