Jeffrey,

We staked out the footprint of the Master Suite expansion.

Please review attached photos. Orange sprayed line demarcates the perimeter of building.

As you can see from Photo #2, the new back wall is only several feet from existing electrical lines and transformer equipment.

This affects:

1. Window at steam shower. We can:
 - a. Keep window as in Pinto elevation and build a wall to conceal equipment. This alleyway, about 4' deep, can be planted and we can grow vines on the wall for greenery.
 - b. Keep window but instead of clear glass install translucent glass for light, no view.
 - c. Eliminate window.

Let me know your thoughts.

Regards,

Silvina
