The Statistics and Information Sciences Laboratory at Harvard University

Patrick J. Wolfe, Principal Investigator
Associate Professor of Electrical Engineering

*School of Engineering and Applied Sciences
Department of Statistics, Harvard University
Harvard-MIT Division of Health Sciences & Technology*

Mission Statement

Our primary focus is the development of **statistical models** and **inference algorithms** that scale to contemporary problems in science and engineering. The field known today as signal processing has greatly expanded from its original focus on vector spaces to include new areas and paradigms ranging from the statistical analysis of **high-dimensional data** such as graphs and matrices to the modeling of signals defined over manifolds and groups. Our methodological expertise spans **machine learning** and inference, computational **harmonic analysis**, and **stochastic computation**. Application areas range from **signal and image processing** to the analysis of **large graphs and networks**.
