Subject: LSJ (thought on

JE . this is just my report to **you** cause you see the big picture a google more than me that said, I would like to think of ways to help and pass those ideas to you to focus there value to at this time.

So Plan is

YOUR OFFICE MAIN.

-New 27" really tricked out super fast monster

-New MAC OS X server on a separate **zero config switch** so if it went down you would just turn on and off would be just for your inner team and your files would be locked down on a server level. with back up and multi location transfers in 256 bit

Keep the cisco build out.... keep the citrix build out but we begin your independence of such networks (keeping all your options open moving forward) so we can rebuild the whole global structure with x number of new ips

stay "whole" on the move with iphone or 4g tethering

We could also have a super compact one suitcase solution outlined

your **go kit NEXT LSJ** **(Jan 2011)defined as mobile solution, for purposes of IT advancement, migration, and mainteance of a : flexible, scalable, and secure operations platform for the entire team.

2- mac mini servers (\$999)	\$1998)line item
2- macbook airs (\$1400 each	\$2800)line item
3-2 time captules (2 tera byte \$499 each	998) line item
2 50 ft cat 6 ethernet	
2 100 ft ethernet	
4- 2 16 port gigabyte switch (unmanaged 299 x 2	698 line item
8 - 12 ft cat6 ethernet	
4 - 6 foot cat6 ethernet >>>>>>>.....	\$ 250 line item
2 4 terrabyte drives	\$ 698 line item

7-8k range based on above

AT HBRK 9am to 5pm monday- thurs this week

thank you -Scott
