Gary,

Please let me know when we can speak about this more. I am concerned about just drawing something up, and having it built, with no real "design". I do not recommend building the pool house with no relationship to the design of the adjacent cabana structures. This will

be pretty visible from above when Jeffrey flies in, and from the sea, and it needs to look right.

I am available today until 12 LA time, or 2-4. Also tomorrow after 10am LA time.

Thanks,

Warwick

Warwick

It is a very simple building, and I gave you the design outline, I will do structural here and we are using trusses, I would think you can get me a set of drawings in a couple days.

Please call me

Gary

Gary,

I got the sketches you sent, and attached is an updated plan sketch based on the new comments. But I am confused about what you are asking us to provide. Our proposal was for conceptual design. It sounds like you are jumping from that to permit drawings in one week. Is that what you now need? And who is engineering the building, including the slab and foundations?

Thanks,
Warwick
