Gary,

I have the outline you sent, but it sounds like you are building something we have not "designed" yet, and are letting that schedule drive design decisions. We provided the basic plans for reference, and are working on the cabanas. But if the oversized sliding glass door in the main room is too large for some reason (not clear why), we propose going with one smaller door and two windows, like the last 3D sketch, rather than two side-by-side sliders.

We need to finish designing the three main blocks with Jeffrey, before we get into details like electrical and interiors. I emailed yesterday that I will be out of the office tomorrow (Wednesday). I will call you Thursday morning to review this.

Thanks,

Warwick

Show the two 8' doors with hurricane shutters like I discussed in another rendering. Also work on the floor plan with preliminary elect and interior elevations
