Mr Epstein team viewer is a free program that was added by Siemens to the system to get temporary free access to my desk top so you can control set points from your computer or I phone. Siemens is working right now on the main computer in my office adding team viewer to the new computer which new access codes will need to be added to your computers today .Siemens is also adding the 6th & 5th floor office sub systems to the set point icons on my desk top for better access to the 5th & 6th fl set points. The SCU upgrade that you purchased was only to bring all the main control panels back up to date with the new hardware and ethernet control speeds as you know the old panels were obsolete. If you have questions about getting a better I pad inter face you need to speak to Scott Dennet the original I Pad proposal from siemens was rejected due to high cost also control 4 . Thanks Richard
