Title: NEWS ALERT: HU's Mobileye is Israel's Largest Ever IPO at \$890 Million

Dear American Friend,

Mobileye, founded by Amnon Shoshua, the Sachs Family Professor of Computer Science at The Hebrew University of Jerusalem, has raised \$890 million in its initial public offering—the largest-ever IPO of an Israeli company in the US. Mobileye is a collision avoidance system that uses cameras and sensors to watch the road and alert drivers to potential collisions with other vehicles and pedestrians.

American Friends of The Hebrew University congratulates Professor Shoshua on leading the way with life-saving technology.
