Igala had tagged the 30+ tall palms but at that time he didn't know about the smaller pool palms,so the ones we got had not been tagged.

I agree that we can put 6 of the best of this bunch in the planters and surround them with plant material we will send Igala to P.R. and tag 5 matching specimens to be shipped next Friday along with the balance of the larger palms for blue beach.its too late to get them on this weekend with the sod

in my opinion,the problem with the flag grading is we hauled fill in to cover the building and at that height it cannot flow naturally into the surrounding grade,I agree it looks awkward .I think there is too much fill and it should come down at least 3' in height to look natural, blended in , and the building screened with planting.

I left my phone on the charger ,will get it after noon

the aplms on the beach CANNOT be planted in any thing other than the main pool planter they are short fat and ugly,, these cannot even go on blue beach.. WERE these tagged,, they are not similiar I see the service road is not yet garded and the flag pole pool grading looks very awkward.. there is not reason it cannot be smoothed and shaped it looks like we didnt , have enough fill. and we know we have plenty,, it looks very artificial
