PORTER

WEEK 1

_____ **Clean and dust walls in Jazz Room basement dining room area and bar** and use large ladder so you can reach the top. Take a clean regular size broom and wrap a damp (clean) apron or tablecloth around it. Lightly brush off the top of walls. Each area should take no more than 20 minutes to complete. Each night you are required to do one area. They are as follows:

MONDAY: Clean and polish wood walls in hallway to bathroom around pay phones and doors to Jazz Room.

Clean and polish wood walls at North wall to service area wall.

Marble wall, column, window frames, front door entrance, door frames, A/C unit on top of door and top and sides of ducts by host stand.

TUESDAY: Clean marble steps and walls from bathroom to first floor.

Clean & polish wood walls at North & South areas to bar.

Clean and polish wood paneling -- all areas:

- Balcony - west walls, bathroom areas, service bus station
- Main floor - west wall at oyster bar, kitchen entrance, paneling behind table 56.

WEDNESDAY: South and Southwest walls between tables 25 to 67. Go up to balcony and clean all windows and window shades inside and out.

South wall between tables 1 to 2. Clean inside and out all window shades.

Wipe down all columns with a lightly damp cloth.

Wipe down wall at stair area with a lightly damp cloth.

Clean and polish wood walls and marble around bar and back bar.

BLUE WATER GRILL

REFRIGERATION COILS CLEANING PROCEDURES

BLUE WATER GRILL
MONTHLY MANAGER PLANNING SCHEDULE
JUNE

Coils must be clean and maintained in proper order monthly. This will assure the proper functionality of the refrigeration equipment, reducing costly repairs and also reduce energy consume.

Maintenances man needs to have the following items. Plastic brush, coil cleaner, spray bottle.

INSTRUCTIONS:

1. In the spray bottle mix water and 4 oz. of coil cleaner.
2. Turn OFF the compressor.
3. Once the compressor is OFF spray the formula on the coil and let it work for at list 5 minutes, repeat spraying, once the grease is loose clean the front of the coil from the top to the bottom with the plastic brush. Repeat this operation until the coil is totally clean.
4. When you finish make sure to turn ON the compressor.

NOTE: Each compressor takes about 15 to 20 minutes to clean.

All compressors need to be clean, including the refrigeration units that do not have cooling coil. (Water cooling units, self contain or remote compressors).

VIP Report any problem with compressor to managers. Be specific.

Refrigeration unit	Num#	Unit description	System type	Compressors location
