Jeffrey,

As per our conversation re your talk with Leon Black--

He just purchased CKX Inc, Bob Sillerman's company, which owns all the rights to American Idol and the Elvis Presley and Muhammed Ali estates . He is in serious talks currently as well to buy Live Nation, which has been operating at a loss since its inception. There would be no one better qualified in this space in the universe than myself to run the whole operation day-to-day or to be involved on the Apollo side as their man inside the operation.

Let me know what happens... please try to get some sleep and rest while you're in Paris.
I will speak to you soon.

Best,

TM
