Finally got a reply re Island.

the island is completely private with a sandy beach.

There are the Aristotele Onassis's Master House, the Jacqueline Kennedy's House, the Kid's House and an house for the staff.

There is a private beautiful ortodox Church (where Onassis married Jaqueline), an important private harbour, a private eliport and tarmak for private jet.

This island seems not only beautiful but also a piece of history.

The boats that you saw belonging to the guests who where on the island.

All the food and stuff arrive regularly on the island.

There is a central indipendent electric generator.

This island is STILL NOT on the market. Steeve has an opportunity to pitch it early.

If interested (perhaps for some of your clients that have a lot of money and do not know where to put it) you should hurry to see it.

If you have time you should go and see it.

Please let me know

B
