Jeffrey,  
what seems to be the issue with theatre, ? is it remote operation?

Brice told me he watched two movies before your arrival and all appeared to work normal for him,. since Brice built the enclosure around projector, there was an issue. We where losing signal from Integra to Titian after 30 min of use, we where going to fedex another Integra receiver to LSJ, Brice moved the shelf above the Intergera to help cooling, never determined what was causing signal loss,. he only said, its fine,.  
-Issue was: after 30 min of normal viewing, the image on the screen would go blank then say "searching for DVI input" so it appeared the DVD signal was lost, the integra is being used for video swithology.

thx,  
Larry
