Subject: RE: Marble in shower and steam

Hi [REDACTED] I will explain the cleaning process we picked for the steam room & shower room from the proposal to JE ,due to cost & time to bring room to a high polish like the vanity tops is very expensive , and it wont hold up to steam and water the finish would not last long in the steam room , because of that we picked to clean the marble , but not grind polish the surfaces to a high gloss mirror finish, we learned this last time we re finished it after a few steams the finish becomes very dull and milky and looked like it was never polished it , it was a waste of money .
Thanks Rich

Je asked me to let you know that they have not cleaned the marble in the steam room and shower in the massage room bathroom on 3.
