**Subject:** good news on 3g micro cell @ zorro

set up test device and got a very clear signal ( test call made to januz and he commented how clear it sounded )

I would recommend 3 more Micro Cells

cost is \$199 x 3 plus tax

so \$600-700

-----  
Need new d-link switch cost is \$300 moving to gigabyte from 100/10 t

-----  
Apple Airport extremes wireless n replacing the g access points

10 x \$180

-----  
ethernet cables

10 \$100

-----  
Please let me know if this is ok to spend \$3,000 for basic network upgrades listed above, this would improve wi-fi and cell phones usage for the main house.

I am setting up a meeting to get a current proposal on the microwave bandwidth upgrade. Details when i have them.

thank you

Scott
