**Subject:** RO Plant

In seeing the RO Plant - state of the art.

At this juncture, I suggest TSG do the following:

- First - a current assessment of the system.
- Second - obtain proposal(s)/quote(s) on a monthly service contract from complete servicing of the system to them providing supervision/utilization/training of current Island staff. And setting up remote access ability.
- Third - obtain proposals from other companies on servicing the system as a price comparison.

Jeanne
