Subject: Re:

1. Will talk to Tom re engineering.
2. Just laid out road at 5 Palms to see if you like it. wasn't sure how you wanted it finished. If the basic layout is OK we need to grade road and then we can build rock retaining wall. Suggest we wait for you to see it , then have staff build later in June when you are gone. Also we need some rock work near generator an Grotto.
3. have sourced road material but not ordered, will order some today

Subject:

the edge of the engineering sea, line should be boulders or a berm well defined. the rocks lining the side of the road away from five palm should NOT be simply dropped on the road as opposed to digging a six inch ditch and mudding them in with cement.. like the road at the flagpole, otherwise we will be redoing them forever after rains.. have we found the road material to spray on to fix the dust.?
