Good Day JE,

I brought it to the attention Tom, Adams, and Brice that the infrastructure for the internet and communication was to be done. I was told by them that you "*did not want any electronics at that site or even a bathroom...*". I continued my efforts to make sure that the structure would have the correct infrastructure by stating, "even he (Jeffrey) never request a computer or phone the availability will be there if and/or when he changes his mind." Gary Moses was there when I said this. There is a conduit running from the generator site to 5 Palms for communications and internet. However, Gary was terminated before the completion of the project and no further work was done for the interior of 5 Palms.

Now, I hear from you directly, I will get internet and phone to 5 Palms service for you **ASAP.**

Respectfully submitted,  
JRuan
