Subject: Heli update

Jeffrey,
We finished the arm rest at midnight last night, function strength and appearance is great. I had a later start than I wanted today, all is well.
I'm in Provo (Grand Turk) now, half way to St Thomas, I'll land tomorrow at 3pm in STT. Helicopter is perfect, no problems at all, autopilot is great. I had to deviate a couple of isolated thunderstorms off the coast of Palm Beach, it was comforting knowing the Radar installed in the helicopter works amazing! I'm very pleased.

Just wanted to update you, .

Thx,
Larry
