Subject: Weizmann

Im sure you know it. Israel's finest

Old friend now big Prof there and frequently publishes in science etc. Is super interested in having me be visiting fellow to build a story around vague or autonomic. Have to align an early project around his lab but that's easy. I know one

Do you ever make grants to weizmann? I want it to be a real Visiting scholar gig part time for a year. Will cost something to do.

Also opportunity at Caltech but not as progressive or with same push/urgency/xrazy Israeli mentality.

Israel can test and do things can't in other places.
