Subject: Re: Re hydraulic hose

the answer to your question is no
we have Parker fittings therefore require Parker hose,
We have tried in the past to buy other hydraulic hose locally but the marriage between another
manufactures brand and Parker did not last
Even though you see many web sight advertising marrying different fittings to different hose,
though experience we know it does not work
Jack confirmed with me that this is the hose that we have always used in the past, for this size,
rating and manufacture
I have explained to jack your concern regarding pricing, he is going to contact his supplier to see
if there is any more room for a discount, will advise
I did check with a couple of companies in florida this morning, they provided verbal quotes but
did not follow spec requirements.

just spent 2 hours searching hydraulic hoses as i thought jacks pricing was aggressive
found 131 foot coil at 15.98 per foot vs jack 29.15 per foot = 1725 savings
http://www.hydraulicsdirect.com/SAE_R13_Hydraulic_hose_p/r13.htm

also found at 18.78 per foot vs 29.15 per foot = 150 ft = 1555 savings
<http://hoses.cutandcouple.com/viewitems/hydraulic-hose/sae-100r13-hydraulic-hose>

jack is proving to be very expensive

[REDACTED] can you please verify that i have sourced proper hydraulic hoses (1" 5000psi sae 100R16)

Rich

Attached for approval, this is for replacement of worn hydraulic lines on heavy machinery.
any concerns let me know
