Greetings Rich,

Per Jermaine,

1. Danny did not discuss the location or range of the unit prior to Jermaine and Liston Networks being on site, which was 1/28/2013. When they arrived that Monday, Danny met Jermaine and the Liston crew at the dock and stated that since the Main complex has good cell signal, a better test would be at Five Palms, where the signal quality is poor. Jermaine told Danny to verify with Brice if it was okay to install the antenna on Five Palms rather than on the Screen room, as was originally plan, when Jermaine spoke with JE about "trying a booster".
2. Jermaine, Danny and the Liston crew were at Five Palms when Danny called Brice for approval of the installation at this site, and Brice then asked Danny if the range was strong enough to go past a mile. Jermaine responded that it was not, but it would definitely cover 500 feet beyond Five Palms.

Only when Liston was on site were these questions asked and answered.

3. Brice then directed for the antenna to be set in the original slated location, which was the roof of the Screen room. Per Jermaine, if Danny only needed the location and range questions answered, now having received the information, the Liston crew could have been dismissed, and Danny could have then proceeded with the installation as was the original plan, and Jermaine still would have assisted, which was the original agreement.

I was updating Jermaine religiously on items that related to him on the Punch List, asking him to update me on his items, and updates that came via Karen. Not once was it mentioned on the Punch List that Danny was awaiting information from Jermaine before he could proceed with the antenna installation.

Please advise, DW

*Good Morning Rich,
Jermaine, did ask Danny to install the antenna, which was on site 1/15/13,
but Danny required a location and the range of the unit, these
questions were never answered, as Jermaine did not know. Only
when Liston was on site were these questions answered.
The only piece of equipment that Danny was asked to install was the antenna,
which he could not do without the above questions being answered.
Hoping this answers your concerns
Warmest regards*

I am told that Danny was asked to do this installation by Jermaine
numerous times but was too busy therefore we hired Liston
Please advise

Thank you

Good morning [REDACTED],

JE gave a verbal directive on the 12/24/12 at
FTC to get the cell repeater. Danny couldn't
complete the mounting of the antenna.
Therefore on 1/25/13 I got the verbal from JE
to proceed with a sub-contractor to mount
the cell repeater along with the termination
of the fiber blue beach. JE also sent me an
email on the 1/29/13 asking where was the
repeater to be mounted.

The "testing" is for the wiring to verify
negative line loss.

The configuration of "Surecell" Radio was done in accordance with "Surecell" specifications. The manufacture sent a piece of equipment that does not work and will be returned to the manufacturer. Liston Networks is consulting with a former AT&T Technician to verify. If this effort fails the unit will be returned to "SureCell".

Regards

JRuan

Hi Jermaine,

In reference to Liston Network Systems for the billing of mounting cell antennas, do you have any backup noting JE approval? Also noting they said they tested equipment, not quite correct since there was no power at that point

Can you fill in the blanks as I will be asked

Thanks

Warmest regards
