President Waheed / Ismail:

As a follow up to last night's discussion, I wanted to let you know the ideal dataset we are looking for as you pull together the list of Voters who Voted in the First Presidential Election

Similar to the documents I sent to you back in November of 2012, in a perfect world, please find the below listing of voter data that we would like to be compiling right away. This information has also been attached in the updated spreadsheet.

Voter First Name

Voter Middle Name

Voter Last Name (Family Name)

Voter Physical Address (Residential Address)

Voter Physical Township Address (i.e. Male / Addu City)

Voter Physical Island / Atoll Address (Male / Addu Atoll)

Voter Mailing Address

Voter Mailing Township Address (i.e. Male / Addu City)

Voter Mailing Island / Atoll Address (Male / Addu Atoll)

Voter Mailing Code (If applicable)

Place of Birth (i.e. Male, Addu City, etc...)

Date of Birth

Gender

Party

Polling Place Location

Phone Number (Mobile / Home / Business)

Email Address

Ideally, the above information can be pulled together for all Voters who Voted in the First Presidential Election. With this dataset alone we will then be able to develop more accurate Demographic Analysis as well as Geographical Breakdowns of who voted in the first election and how that electorate was made up of

I have also attached an updated version of the table that lists out all of the above data field requirements

Please call me on my Cell Phone if you wish to discuss further

McGee
