**Subject:** GII engine extension

Jeffrey,

GII engine extension must be approved by Rolls Royce in Germany after completing a satisfactory Borescope of the engine.

If Rolls Royce approves extension the pricing is high for short amount of extended time:

60 day extension IF approved is \$30,727.00

90 day extension IF approved is \$52,045.00

I will have possible three options for engine exchange for the GII by Friday, BixJet Engine shop is adjusting their prices to current date since calendar effects value of these engines.

thx,  
Larry
