Subject: firrst impression

1. i enjoy m and m candies , you seem to be a new yorker coated in west coast. 2. my biology - encryption interests are based on smelling rewarding avenues of exploration before i can see them , hindered by my lack of deep knowledge of either. 3 However ,after our cal,l my thoughts on finance encryption possibilities, is more exciting, . bit coin did have a great idea as though gold had been a foundation for currency for years because it was perceived to be limited, it is no longer true, all money needs a limited or transparant limit. bit coin was clever in its algorithmic limiting of resource, based in math rather than metal. With zero knowledge proofs and signifcalty faster and robust memory, the financial system is ready, for a makeover. (do- over in brooklyn vernacular). . look forward to next call
