Subject: warren

Just got a text and Warren is having a rough few days. Sleeping a lot and not eating at all. I imagine its anxiety, nerves, concern, scared, depression – all of it, Im sure. Frog would know better than I would Tomorrow is the scan results around 4:30 cst. Lets all be hopeful.

Warren's Text's lately have been very short like he's losing energy and attitude. Not much we can do but wait til tomorrow then we'll go from there.

Izmo: Lets take a wait and see approach on your visit this week. TK
