Subject: Stuff

Can't make island this weekend. Popular destination (region) over holiday. Im attending at hospital starting Monday till Jan 2.

Got a call from the relevant [REDACTED] at [REDACTED] asking me if i reconsider another offer. It was unexpected for sure. She asked me to give her a week to come back with an offer. Says there is a big re org underway in next 4 months (already knew that) and she had an offsite this week with other members of leadership team.

Still pursuing secondment as we discussed. Almost through the legal stuff.

Such a roller coaster.

Have been thinking about cyber security mobile money, digital currency, ubiquitous social networks etc. All point to a need for sure. Feels like teaming up with the cyber criminals is the way to learn? Russians, Chinese seem to understand space best.

Also quite a lot of overlap with (human or cellular) immunology and even metabolism.
