Is bigger more competitive?

Globalbanking.org: A wealth of ideas and data

Center for Financial Markets' Staci Warden
introduces Globalbanking.org

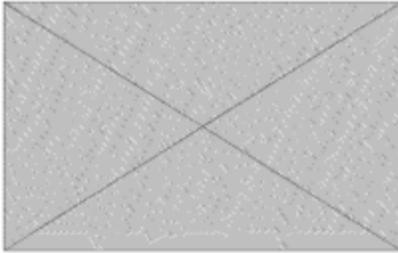

The Milken Institute recently launched Globalbanking.org, a one-of-a-kind information on banking systems and regulation worldwide. Using a graph, the data site explains and compares the banking systems and regulatory frameworks of more than 200 countries.

It is designed to help policymakers make informed decisions and academics, journalists and the public deepen their understanding of the factors that influence global banking. How restrictive are a country's banking regulations? How independent are its regulators? What are the size and structure of its financial system? Globalbanking.org provides answers to those questions and more.

Myanmar into a new chapter of its history. More...

A nonprofit, nonpartisan economic think tank, the Milken Institute believes in the power of finance to shape the future. The Milken Institute produces rigorous, independent economic research — and maximizes its impact by convening global leaders from the worlds of business, finance, policy, academia, and philanthropy. By fostering collaboration between the public and private sectors, we transform great ideas into action.
