Jeffrey
attached for your consideration

Letter from Horizon Mechanical Systems
Product information on Staco Automatic Voltage Regulators

In 2004 you approved the installation of Surge Suppression at the Main Electrical panels and each Sub panel in the Main House , at a cost of \$6100.00.
This equipment is design to take some of the impact of a Power Surge, there is no protection from Brown Outs

I did explain to Duane that we where looking for a simpler solution, but the size service and single phase are the driving force behind equipment selection and price, if you wish to protect the whole house from brown outs and surges.

How do you wish to proceed
