Drawing inspiration from the master of modern architecture, today's collection is inspired by a Chinese-American architect who is best known for his progressive style and his ability to couple tradition and simple geometric patterns. He focuses not only on the design itself, but also on how a building will affect those who inhabit it. One of the most celebrated modernist designers in the world of architecture, he's known for his work on buildings such as the John F. Kennedy Presidential Library, the Miho Museum, the Rock and Roll Hall of Fame, and the Le Grand Louvre. In this special collection, we've hand-picked items inspired by his unique design elements. Browse simple yet elegant furniture pieces, coupled with fun geometric accents to add a touch

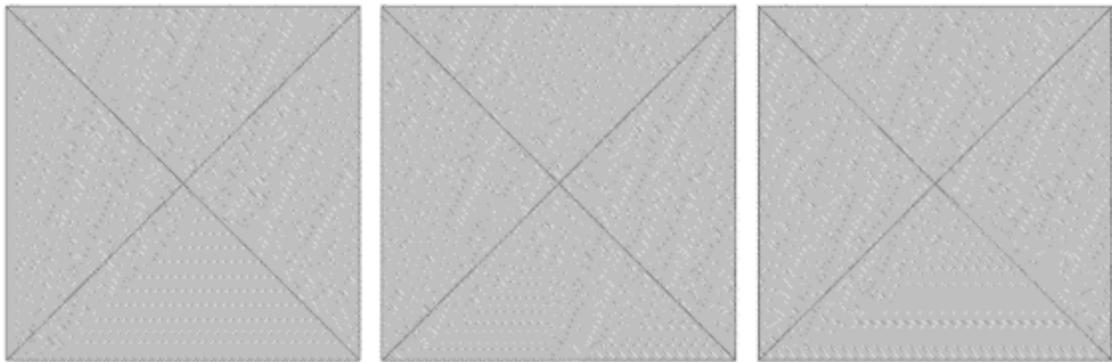

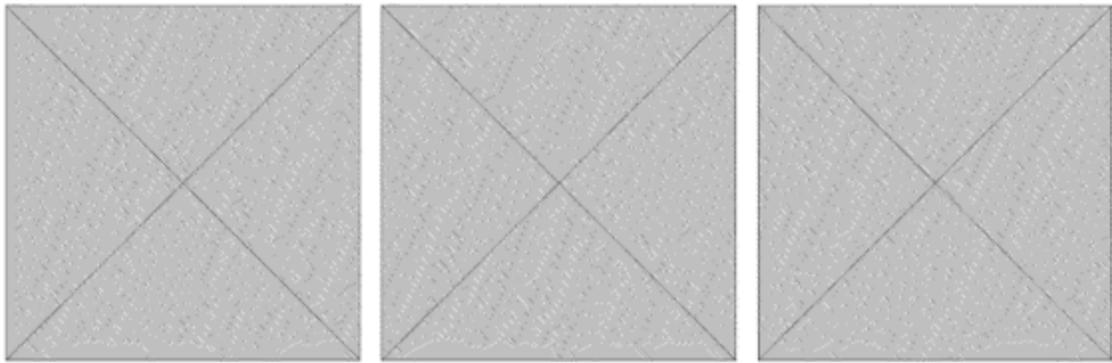

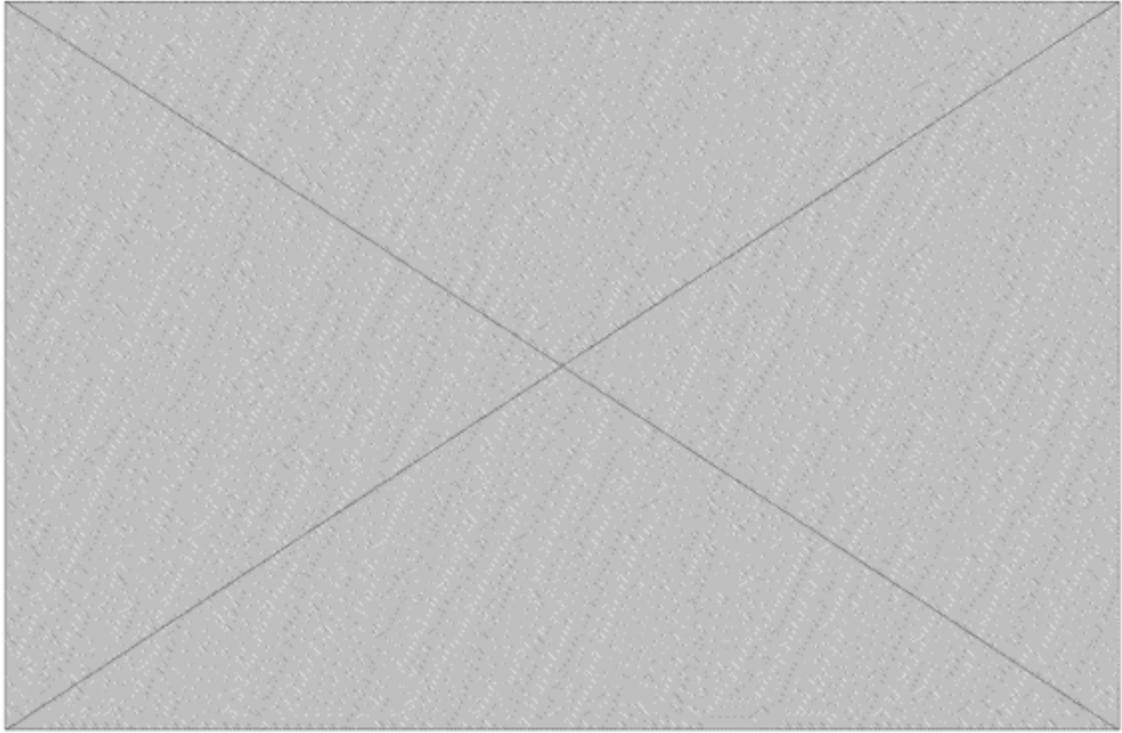

of unique style to your home.
