Jeffrey

Both T1's, Phone and Data are up and running at the ranch, and I have upload the T1 program to the Adtran Router for your visit.
Speed tests are showing the New Adtran Router delivering download, upload speeds of 1.46mbps and Ping of 99ms, which are consistent for 1 xT1 services
The Cat 6 Cable to the radio in the Mechanical exhibited a fault 4 feet in from the ethernet plug. Cable was cut back 6ft and terminated. Richard Boltz has setup me up with testing equipment for the microwave link so in future I can test from Ranch directly to Time Warner, instead of wasting time going up to Sandia Crest.

Richard B recommended contacting Durham Communication AZ regarding another Estimate for the 6 GHz , 5 data T1's and 1 PRI phone T1.

Please note the existing bid is **Limited to 8 T1's** if you wish to have more capacity please advise now much more.

I have contacted Durham Communications and info forwarded to obtain another bid.

He also advise as soon as we have equipment information we should File a Licensed Link application. He is prepared to assist us with this application.

Brice
