wyler suggests he is the owner of world vu, what number should i call you on.

On Thu, May 22, 2014 at 9:10 PM, Tren Griffin <[REDACTED]> wrote:

The filing name is L5, filed by UK/OFCOM to the ITU:

- First Coordination Request filed in June 2013 : 360 satellites (18 planes of 20 sat) inKu band.
- At the same time C band has been filed through another procedure for the same 360 satellites
- Filing modification filed in sept 2013 (published in jan 2014) : 18 planes of 20 satellites + 31 plans of 52 satellites = 360 + 1560 =1972 satellites. Orbit between 800 km and 950km depending on the different orbital plans. Ku band only.

ITU reference is CR/C/3413 and its subsequent modification.

The company that has submitted the filing to UK/OFCOM is named WorldVu Satellites Limited, and seems registered in Jersey.

Technically, the filing describes user terminals of 10cm, 30cm, 50 cm and 1m size, and gateways of 5m. The system will implement GSO arc avoidance to limit interference to incumbent geo satellite"

Lets set up a call.

I have seen the deck Wyler is sharing from the consultant. 70 sats at first, polar orbits, \$3.5 billion, Ka/Ku band. Iridium style orbits. I've met him before.

Kymeta is important for this idea due to very low angles at equator given orbits.

Skybridge owned/owns zero spectrum. An allocation to a service by the ITU is not ownership.

Tren – Bill thought it would be good for Jeffery (on this mail) to connect with you re: O3B and other things he is looking at it.

I will let you two take it from here. – Larry

**Subject:**

greg wyler, the guy who was involved in O3b , owns the spectrum formerly owned by Skybridge. He has put together a plan to launch 100kg sats in leo. Bill thought Tren was the guy to speak to on this, supposedly requires under 3B.
