Hello Jeffrey,

I am truly sorry to hear of your trouble.

Can I ask a few questions?

What make and model did you try? I want to fully understand what isn't working. Hull form, dead rise, weight, CG, etc.

Will you share this with me?

All my best
Scott

my boat came and was sent back to manufacture two days later. could not handle chop without pounding. want to try? google boys bought salthouse boats catamaran... A true fast rib that ran on the water as opposed to chopping through would be a great hit down here. . Lets start a design if you liike

Good Morning Jeffery,

I am sorry for the confusion. I saw a preliminary design a few weeks ago and I know Jensen was engaged with the drive train company getting the initial Application approvals.

I know they were also working through the laundry list of mandatory engineering documents. It's things like hydrostatic structural analysis and these must be done before any new project.

I'm truly sorry that we did not communicate clearly on the timeframe needed to do this documentation. But it's the only way we can absolutely make sure the product is right when we deliver it. Basic designs are very easy to do in a hurry but the actual engineering documentation and certifications do take some time. We should've done a better job communicating this. I'm truly sorry and take 100% responsibility for this miscommunication.

Thank you for considering SAFE Boats and please know we are here to help with any boat issues you might have.

Thanks
Scott

Since we have heard nothing re boat for a month, I have assumed you are not interested. We have moved on to another manufacturer.
Thank you for the time spent.

I know we can fix that. But let's make sure you are the first kid on the block with the "BADEST" toy.

scott . as you know there are about ten to twenty private island owners down here, no one has a good boat. Branson uses a nautica , larry paige a zodiac

Jenson, Kevin

I would like to introduce you to Jeffrey. This is the special project that we discussed.

Although we are not under a nondisclosure, we shall proceed as we are under one.

I would like to keep Jeffrey's information confidential between this team.

As we discussed, this is for use in the Caribbean. It is a high-speed transportation craft. We need to meet or exceed 60 mph with eight passengers on board.

Ride quality, speed, safety and close quarter maneuvering is a priority.

I showed Jeffrey some photographs of AWI (all weather interceptor.) He would like something that looks meaner than that.

I would like the design of this craft to be unique and make a statement.

Jenson, can you work some of your magic? Please keep us in the loop on progress and feel free to contact me at anytime with questions.

Thanks
Scott
