Thanks for your frank thoughts.. actually Rob BOyd does sophisticated game theory simulations.. maybe more sophisticated than Martin... in any case, I am sorry you missed some of the more exciting aspects of the board discussion, but I hope you got something out of the meeting.. I suppose the standards of several of the attendees are lower than yours.. in fact I am sure they are, but 3 people at the meeting have written saying it was the best meeting they have ever attended and that they got a lot out of it that will spur on their own research.. In any case, it was a pleasure to spend time with you.. looking forward to October.. and disneyworld.

congratulations. . . 1. board meeting was typical and conclusions could have been we will try to study everything from quanta. to cells. to behavior, to stars . --- silly, no defined goal ;, project. metric, . 2. study on violence even sillier. tools from the last century, extrapolations from written reports and observations, politically correct, bloviating, . - game theory has moved on, punishment, altruism with computer simulations, algorithms millions of outcomes per second, as opposed to listening to a poem from an aboriginal tribe and ascribing meaning.

I have recently seen Rolling stones, the who. bruce springsteen, billy joel, pinker, dawkins etc. all good performances doing their oldies.
