to jeffrey

Dear Mr. Epstein,

I have been a stage IV cancer patient for close to 4 1/2 years and read of all you have done, and continue to do to help advance research on many levels. I applaud and thank you for this!

I have been successfully kept alive by my amazing medical team, headed by Stanislaw Burzynski, MD, PhD and three oncologists who are working with him, 2 of them from Cancer Treatment Centers of America. I have had genetic studies done of my triple negative breast cancer, and have been on individualized, targeted therapy.

I have two requests of you:

1. That you quietly financially help Dr. Stanislaw Burzynski. He has been relentlessly attacked by "skeptical" groups and others all over the Internet. I ask that you not believe these biased reports, that you meet with him, and that you back him financially behind the scenes. I personally know patients he has saved, who had been written off by the major cancer centers as hopeless, who are living healthy, cancer free lives 20 years+ out after being treated with antineoplastons by Dr. Burzynski. Many efforts have been made to shut him down by the FDA and Texas Medical Licensing Board, for reasons I don't understand. I could get you contact information for these patients as well as Eric Merola, who made 2 Burzynski documentaries, and Ric Schiff, who is a San Francisco police officer whose daughter was treated by Dr. Burzynski, who speaks at a Congressional Hearing in the first documentary, and who has started www.ANPCoalition.org which is raising funds to pay a lobbyist to get Congressional Hearings to make ANP available to all patients facing their death from cancer. The FDA has a hold on them.

2. That you help us lobby Congress to make a law that overrides the FDA's rigidity and restrictions in allowing patients fighting for their lives to choose the treatment(s) they want when facing a cancer diagnosis.

Please contact me. Cancer patients need help to change the status quo. 600,000 of us die in the USA each year being treated by the medical status quo, while pioneers and "out of the box" thinkers, like Dr. Burzynski are destroyed with ridicule and legislation and regulation by the FDA. You have the power and ability to help, and I pray you will.

Thank you!!!
