**Subject:** interior- A operation and mechanicals -D minus

interior looks great. cabin door needs adjustment rubs on carpet. not sure if painting on the sides of the carpet is right, it seems to shine. . fabric rubber? the noise is much better, but not right in psu in rear corners or front passage. ( baffle for outflow). lights or air tubes in psu's made quite a racket on take off and landing banging against something. ( loose bulbs tubes? ) . Two big issues We still have a major electrical problem. new screen blinked , repeatedly , went off twice, I have video had to be reset. lights on dim flickered and shut off randomly . no change since last time, had to keep the screen and lights off. made me crazy. . gaspers are great. . entertainment , a nightmare.- and that after months of prep and three weeks down. - 3 remotes. two with no fixed place. one went flying on take off, a system that has no right left balance for speakers that are in essence hidden behind the pass seat. ( should be chrome stands not white ) apple tv needs to be reset each time?with date and time. ? music only scrolls alphabteccally so trying to listen to the WHO. is im[possible as you have to wait a minute as you scroll from A to W. and then often start from the begining again as operation leaves much to be desired. flush sign- great
