Issue 2, 2014

Write Faster Code with the Wolfram Language »

On February 25, learn more about computing with *Mathematica* and optimizing your Wolfram Language code. Our experts will be on-hand for a Q&A, and we'll host a speed tour of *Mathematica* and present the Wolfram Language on Raspberry Pi. See full details for this free virtual workshop and register today.

Special Offers for Educators »

Now's the time to take advantage of special offers on popular Wolfram technologies. Get great deals on *Mathematica* and Wolfram|Alpha Pro for your courses or save on course and computer lab bundles. Contact us at sales@wolfram.com to learn what special offers are available to you.

Play *Mathematica* in a Game of Rock-Paper-Scissors »

Think you've got what it takes to win? Rock-paper-scissors with an AI player looks at your play history, its play history, and your combined history for the longest matching sequences to predict what you'll play next. The longer you play, the better *Mathematica* is at learning your choices. See how it works and then try to beat the computer.

New On-Demand Courses Available »

Over the past few weeks we've updated our catalog, adding several new on-demand courses, including "Design Interactive Demonstrations for Your Classroom." This course highlights the Wolfram Demonstrations Project, explaining how you can create your own Demonstrations for classroom use. Select this title from our training catalog and watch now for free, or browse for additional course options.

Apply Now for the Wolfram Science Summer School 2014 »

Are you, or is someone you know, an advanced undergraduate or early graduate student interested in doing original research at the Wolfram Science Summer School? The program helps about 40 students from a diverse range of scientific backgrounds learn about Stephen Wolfram's *A New Kind of Science* and apply it to their fields of interest. The Summer School takes place June 29–July 18 in Boston. Apply now.
