Particle Fever!
Tuesday, March 4th, 6:30 – 8 PM
The Gallery

Particle Fever is a new film that follows six brilliant scientists during the launch of the Large Hadron Collider – the biggest and most expensive experiment in the history of the planet. Join us on the Gallery Steps for a unique opportunity to hear from all six scientists, the film's director Mark Levinson and producer David Kaplan as they show you their favorite clips,

and discuss their attempt to unravel the mysteries of the universe and the origin of all matter. The talk will be moderated by the critically-acclaimed Dr. Stephon Alexander, a theoretical physicist specializing in particle physics and cosmology. Expect to leave with a better understanding of why we exist! Presented in collaboration with BOND360 and Abramorama.

110 E. 25th Street
