Subject: Paris Password

Good day boss,

I reached out to Scott Denett and he stated he doesn't know the password, which lead me to contact Bill. He states he set them up and it should be your standard password (all lower case) like on LSJ the Hint: Mary's violet eyes is a reference to the solar system. If there is still a problem I have included below instruction on how to bypass the password and reset it.

Regards

JRuan

Instructions:

1. Power on or restart your Mac.
2. Boot to Safe Mode by restarting and after the chime press and hold down the **COMMAND-S** keys until a black screen with white type appears.
3. At the prompt, type the following commands pressing return after each command line: **/sbin/fsck -yf**
4. If you do not receive a "Filesystem OK" message then repeat this command until you do.
 - a. If after seven tries you still do not receive a "Filesystem OK" message, then the system is corrupted and needs to be reinstalled.
5. Type **mount -uw /** press enter
6. Type **cd /private/var/db/netinfo** press enter
7. Type **mv local.nidb local.old** press enter
8. Type **rm ../AppleSetupDone** press enter
9. Type **shutdown -r now** press enter
