Subject: Bose stereo

Jeffrey,
I'm very pleased with the audio of the dual Bose systems in the GIV

we completed the Bose Demo inside the GIV, during music play back, the center channel in FWD club system is dominant with Voice imaging, when we remove the center channel from the system and program the BOSE to playback in 4 channel stereo, the system sounds great. We also have the second Bose system on the credenza playing as well.

Bose system in FWD club area would be, two cube speakers on each ledge fwd and two cube speakers behind each seat and Subwoofer.

- Credenza system will only be L/H and R/H with subwoofer for music or Movie playing, NO center channel speaker on either system, is this OK? or thoughts?

thx,
Larry
