Subject: Tennis Court Poles / Net & Anchors

Please note that Anna had placed this order last week when you asked her however, when we found out that no other provisions were made by Danny we put order on hold to ensure that you make the proper selection of color, etc.

We also just learned that the actual pole and center anchor are not cemented into the slab. It was suggested that we purchase a 10' PVC pipe 3" diameter which acts as a sleeve to hold pole 2.875" in place. We should cut 10' pipe in half and sink in at least 30" for each post. It will be cut off at grade when concrete is cured. It was also suggested to use a 12" diameter for the form to leave opening where the center anchor will go.

Please see link below which also gives more details on installation instructions.

http://www.tenniscourtsupply.com/Douglas-Premier-XS-Tennis-Net-Posts_p_40.html

Attached below is also Center tie down link installation instructions.

http://www.tenniscourtsupply.com/Center-Tie-Down-Anchor_p_32.html

Please advise on the following:

- 1) color of the net post you would like: Open Blue, Green or Black
- 2) winding crank for net: Brass or Stainless Steel
