Subject: Tennis Court Lights

Attached is PDF from LSI Industries (same company we purchased main compound lights from). The lights that we are proposing is the CXLS-A Single Light System

http://www.lsi-industries.com/documents/literature/courtsiderXL_brochure.pdf

Please advise on the following selections that need to be made:

1) CXLS-A Single Light System: 6 vs 8 light systems (see page 4 of PDF)

cost of lights are 935 per light

cost for 6: 5,610

cost for 8: 7,480

(still waiting on better pricing which was requested)

2) CXLS-C Double Light System - 4 pole light system

cost of lights are 1,610 per light

cost for 4: 6,440

Danny proposed a 2 light system which we have not seen in any of our research and confirmed with vendors does not work

Double lights are mostly used in multiple court configurations and if we wanted to use they would be best placed 25' from the net line (center)

Danny also has confirmed that we have enough power at Berm for 6000 or 8000 watts

3) color selection: green, black, bronze (10 day lead time to ship) - other colors are 20 days - (see page 5 of PDF)

Other facts:

a) most courts try to match the light and fence colors

b) delivery to tropical is 2 weeks for green, black or bronze

c) anchor bolts are galvanized and poles are powder coated

d) lamps are 1000 watt metal halide

e) poles are 20' and with fixture 22' for 6 or 8 light system and 24' and 26' for 4 light configuration

f) poles are mounted outside of fence
